Liberty Chapel

Liberty Chapel, Feb. 18. Guess the farmers are needing that snow that is reported on the way.
Mr. and Mrs. J. H. Reynolds are spending some time visiting relatives in Lynchburg, Lexington, Rockbridge and other places of interest.
We are glad to have Mr. and Mrs. Lonnie Reynolds as residents of our community. Lonnie saw much service in the Navy during the war, and friends are wishing for him much success in the future.
Mrs. John W. Gunter called to see Mrs. Monroe Garrett Sunday afternoon.
Sam Gunter, of Roanoke visited this brother, John, Sunday.

Colored Dots

The general public is invited to attend the closing exercises of the Health project program of Appomattox County at the Carver High School this Friday evening at 8:30 o'clock. A special program will be presented by a committee headed by Mrs. S. P. Burress. Music for the occasion will be furnished by the quartettes of the high school. All are asked to be present and on time.
A large crowd attended the religious preaching at the Carver High School last Sunday. Rev. N. R. Jordan. The total offering during the day was \$60.50, which included a special offering of \$25 for the Williams family which recently suffered a great loss by fire.
Mrs. Massie Stevens spent several days last week in Roanoke.
Burial services were conducted at the grave for the late Mr. and Mrs. Stephen McCoy, who died at the Lynchburg General Hospital last Monday morning.
The funeral of Deacon Tom Chambers, 89 years old, who died at his home Sunday morning, was conducted from the Springfield Baptist Church Wednesday at 2:00 P. M. Rev. Cain was in charge.
Rev. R. Q. Lawing and family spent Sunday evening in Petersburg.
Peter Flood, of Baltimore is visiting his parents here.

Shorten Time Of Operations

Impressive services were held at the Chestnut Grove Baptist Church last Sunday by its pastor, Rev. N. R. Jordan. The total offering during the day was \$60.50, which included a special offering of \$25 for the Williams family which recently suffered a great loss by fire.
Mrs. Massie Stevens spent several days last week in Roanoke.
Burial services were conducted at the grave for the late Mr. and Mrs. Stephen McCoy, who died at the Lynchburg General Hospital last Monday morning.

NEGRO EXTENSION NEWS

A forestry field meeting was held on the farm of Colonel Walker of Hixburg community. It was the first of its kind and was very well attended by farmers interested in protecting their woods. Mr. Williams, forestry specialist, working out of the Soil Conservation office in Appomattox, was in charge. The demonstration consisted of a tour of the 140-acre plot of land in the midst of Mr. Walker's woods, kinds of trees, marking thinning, etc., were the main topics discussed.
A 4th member from the Carver High School Club, Beate Williams, won second place in a garden contest sponsored by a commercial firm. All friends and patrons are asked to give their \$5.00 by Friday evening Feb. 21, at which time the drive for better health conditions at Carver High School will come to a close. The leaders are hoping that the total amount of \$800 will be brought in Friday night.

Disease Traced To Warmed-Up Coffee

Specialist Gives Formula for 'Fountain of Youth.'
BOSTON. — Dr. Oscar A. Strauss, veteran specialist in the diseases of the artery, has offered his new formula for a "Fountain of Youth" to prolong human life.
Part of this formula was: If you drink coffee, don't drink warmed-up coffee. Be sure it is fresh.
A private practitioner in Chicago, Dr. Strauss said the drinking of warmed-up coffee is one of the causes of artery disease—such as hardening of the arteries, hypertension, or high blood pressure—which he described as "probably the chief cause of the aging process in man."
He made his report at a session of the 112th annual meeting of the American Association for the Advancement of Science.
He said that coffee or tea, when freshly made and properly prepared and not reheated, can be carried away by the human body without harmful effects.
But, he warned, once the oil is separated in coffee, it will not unite again upon reheating.
This oily substance in coffee, he explained, is an irritant to the inner wall of the blood vessels and thereby is a contributing factor to the development of the disease.
And as for tobacco, he said, "The well known. The heavier the tar content, the greater the amount of phenol and irritation absorbed by the blood stream. Nicotine, although toxic, is more of a local irritant through constant use."
Dr. Strauss said that a lack of oxygen is another cause of artery ailments.
"A month spent in outdoor life, in an environment of rest and relaxation, has greater restorative value than a vacation than any form of medical treatment," he said.

Says Chemistry May Solve Food Problem

BOSTON. — A prediction that the world some day may feed its starving by use of radiation chemistry was made by Dr. Charles F. Kettering, head scientist, at the convention of the American Association for the Advancement of Science.
Radiation chemistry, also known as photophysics, is, he said, the method nature uses to make the earth's present food supply out of carbon dioxide of the air, and water, and a few minerals.
"We know little of the process now," he declared, "but some day we may be able to reproduce it in the laboratory."
He said radiation chemistry is a secret of photography, but that its principles are used only to a small extent in industry.

New Surgery Effecting Cure Much Sooner, Out of Bed First or Second Day

CLEVELAND, OHIO. — Getting people out of hospital beds the first or second day after operations and on to their normal lives was the near miracle of surgery that was described to the American college of surgeons by four physicians.
The speedup is partly a by-product of actually started before the war. The physicians were Howard Rusk, New York; Philip H. Kessler, Philadelphia; John H. Powers, Cooperstown, N. Y.; and Henry H. Kessler, Newark, N. J.
Dr. Powers told of 238 civilian patients, operated on for appendicitis, hernia and several other abdominal operations. They got out of bed the first or second day. They were compared with another group of 120 who stayed in bed 12 days.
Those who got up left the hospital five days to a week quicker. They were in less pain and less than half the time. They required less morphine and had less gas pains. They ate good meals sooner. They had no reduction in postoperative emphysema, but the danger of blood clots after operation was much reduced. Strangely, there was no more weight loss than for those who stayed in bed for those who got up and who ate more heartily.
Dr. Rusk told of a Chinese soldier whose heart stopped beating during an operation. The surgeon opened the chest and massaged the heart back to life. The operation was finished and 18 hours later the soldier walked two miles to a hospital to buy fruit. Dr. Rusk said the Chinese have been practicing postoperative ambulation—the technical name for getting out of bed soon—for a long time.
Heart is smaller.
Dr. Rusk summarized some University of Minnesota and Cornell university experiments showing that staying in bed does to a healthy man. His heart in six weeks in bed shrinks 11 per cent in size. The work that would give him a pulse rate of 125 before the bed rest costs him a rate of 175 afterward, and it takes him six to eight weeks to get the heart rate back to 125. His reaction time slows down. In bed he has six weeks in bed the man cannot do sustained work. In bed he has to be fed twice as much protein to maintain a good protein balance.
Finally, said Dr. Rusk, the better the man's condition when he goes to bed, the more rapid will be his deterioration.

Shelter for Calves

Shelters for calves and heifers should be dry and well-bedded. The weeks to get the heart rate back to 125. His reaction time slows down. In bed he has six weeks in bed the man cannot do sustained work. In bed he has to be fed twice as much protein to maintain a good protein balance.
Finally, said Dr. Rusk, the better the man's condition when he goes to bed, the more rapid will be his deterioration.

Home, Farm Lead In National Accidents

With the accident rate skyrocketing and the home and farm leading over air, rail and highway as the scene of most accidents, it is time we settled down to some constructive thinking and acting along safety lines. Most of these accidents would not have happened if someone had been a little more careful, thoughtful or alert, or if the farmer would inspect his equipment before using it.

A LIVE WEEKLY NEW SPAPER AT HISTORIC APPOMATTOX COURT HOUSE, VIRGINIA — ESTABLISHED IN 1892

PRICE 55 NUMBER 8

On Next Week

The next Old Dixie Barn Dance will be held at the local high school auditorium on Saturday, March 8. Sponsors of the p-pair program stated that the weather conditions brought about the postponement, but that a fine line-up of hillbilly musicians would be presented on the surface of their stock tanks.
An adequate year-round water supply is essential to enable dairy cows to continue to milk production and to maintain economical gains on beef cattle and hogs. A pressure water system will do the job most of the year, but what about those freezing months farmers now are facing?
The following results of tests conducted by Purdue university help in approaching the problem: There is

Good Farm Wiring Is Held Essential

Expensive to Pay for Preventive Power Loss
"Anything less than good wiring to the farmstead is not only a serious bottleneck to successful use of electricity, but usually causes disaster."

Harvest Connecticut's

infestation and needless expense in the use of electricity for anything beyond lighting and minimum power uses." William A. Ritt, Minneapolis, Minn., declared at the national farm electrification conference.
In planning the wiring for a farm, Ritt declared, the average farm must be considered as an industrial plant, a production and processing plant for products. The greater the degree of processing performed on any farm, the greater is the return in terms of farm income, he explained.
No matter what efficient equipment a farmer may employ, he will arrive at a more complete and profitable electrification, its successful operation depends upon a good wiring installation.
Larger capacity service entrance, heavier conductors to farm buildings and also for serving the heavier horsepower motors now being used, an increased number of circuits and more attention to balancing loads among the various circuits, are among the outstanding needs of farm wiring systems today, Ritt said.

Big Annual Rock Crop

A machine that will harvest the Connecticut farm's biggest crop recently was demonstrated under supervision of University of Connecticut.
The crop—stones—will be picked up by the new tractor driven stone
